# LOW-COST SPAY & NEUTER AN EASY FIX!

Spaying or neutering your pet is crucial in helping to reduce the growing population of unwanted pets. Millions of animals each year end up in shelters, and sadly, many of them aren't no-kill like we are at HAP. Last year, more than 1,000 dogs and cats were killed every day in US shelters simply due to space.

## BUT DID YOU KNOW ABOUT THESE EXTRA PERKS?!

### INCREASED LIFESPAN

Spaying & neutering can actually help your pet live longer! Various studies show that fixed dogs & cats live *significantly* longer than unaltered pets, up to 62%!

### LOWER RISK OF CANCER & REPRODUCTIVE ISSUES

Altered animals have a decreased risk of reproductive issues and cancer, specifically uterine, ovarian, and breast in female animals and testicular in males.

### BEHAVIORAL IMPROVEMENTS

Due to hormone reduction, spayed & neutered pets are less likely to exhibit aggression, roam, or mount.

### LESS MESS & STINK

Altered animals are much less likely to mark territory, meaning they won't spray or urinate in your home, and spayed females won't go into heat, meaning much less mess!

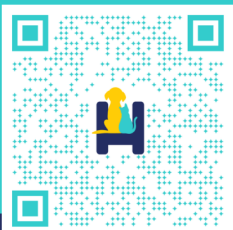

## AND DESPITE THE RUMORS...

### YOUR PET WON'T LOSE THEIR VITALITY!

As we already mentioned, altering your animals can lead to longer lifespans and healthier, happier pets. Anything you hear to the contrary is just nonsense!

### IT'S AFFORDABLE, ESPECIALLY AT HAP!

Cats are just \$65-\$80 and dogs \$150-\$325 (based on gender & size) in our New Castle County clinics. If you qualify for public assistance, it's only \$20 through the State of Delaware's Fixed and Fabulous program (with participating vets throughout the state), and includes a FREE rabies shot!
